#### Mindfulness Meditation Script

#### Begin by finding a comfortable posture:

Sit or lie down in a position that allows you to be relaxed and alert. Rest your hands on your lap or by your sides. Close your eyes gently. Take a few deep breaths:

Inhale deeply through your nose, filling your lungs with air. Exhale slowly and completely through your mouth. Repeat this deep breathing pattern three times. Bring your awareness to your breath:

Notice the sensation of your breath as you inhale and exhale. Feel the rise and fall of your chest or the gentle expansion of your abdomen.

Shift your attention to your body:

Scan your body for any areas of tension or discomfort. As you exhale, allow those areas to soften and release tension.

Notice the sensations.

Bring your attention to the sensations in your body and the contact points with the surface you're on. Feel the support beneath you.

Observe your thoughts:

Allow thoughts to come and go without judgment. If your mind starts to wander, gently guide it back to your breath or the present moment.

Focus on the present moment:

Pay attention to the sounds around you. Notice any smells or tastes in the air. Expand your awareness:

Imagine a gentle, warm light surrounding you, creating a sense of calm and tranquility. Let this light fill your entire being, bringing relaxation and peace. Countdown to awareness:

In your mind, count backward from 10 to 1. With each count, allow yourself to become more present and relaxed. Slowly return to the present:

Wiggle your fingers and toes. Gently open your eyes. Take a moment to appreciate the stillness and calmness you've cultivated.
